MEMBRANE SKINNING

MAJA[®]

EASY

Technical details

Type	Cutting width mm	Width of machine with operating lever mm	Depth of machine mm	Height of machine mm	Electrical connection kW 3AC/50Hz/400V	Air consumption 6 atm. *) l/min	Weight kg
EASY	341	753	622	994	0,75	---	165
EASY/1	341	753	622	994	0,75	260	165

*) Connection:
3/8 " quick coupling

The smallest MAJA membrane skinning machines type EASY are made for optimal skinning in the butcher's trade section. Cuts of pork, veal, beef, game, poultry and horse can be skinned quickly and precisely, as well as precious meat cuts from lamb, ostrich or kangaroo.

Refining precious meat cuts by gentle automatic membrane skinning in connection with anatomic deboning helps to increase the yield by adding value, not only for the presentation for sale in a appetizing way, but also for further processing.

TECHNOLOGY FOR THE FUTURE

Equipment & features

- **Continuous transport roller cleaning for always perfect skinning results:**

EASY: Transport roller cleaning without compressed air by patented MAJA 3-roller cleaning system, enabling flexible machine installation.

EASY/1: Transport roller cleaning by compressed air.

- **Operator-friendly machine structure:**

Operation by ergonomic foot pedal design (flat material), thus more comfort for the operator without marks left at the operator's foot.

- **Easy and safe handling of the knife:**

No removal of the knife holder for cleaning and knife changing. It remains in the machine and is only put into cleaning position. Tool-free knife changing by quick-locking device.

- **Hygienic machine design:**

No removal of machine parts for cleaning.

All parts can be cleaned easily.

Besides that, the machine is closed from bottom.
