# Frozen meat cutters

[laska.at](http://laska.at)

High-performance construction guarantees  
optimal cutting for efficient further processing.

# Extremely robust, outstanding cutting performance and high hourly output

Machines	Block cross-section (W x L) in mm	Processing temperature in °C	Cutting method
G 530	520 x 300	bis -25	Guillotine
G 740	700 x 400	bis -25	Guillotine
GS 510	500 x 300	bis -15	Bowed knife
GFS 620	600 x 380	bis -20	Cutting teeth

## Strengths and benefits

The frozen meat cutter can be used for frozen meat and other frozen foods. Adjustable cutting forces and heights allow individual adjustment to the product, with low application of force and the greatest possible cutting performance. Its gentle functioning extends the life span of the machine.

## Applications

Meat  
Fat  
Fish  
Vegetables  
Fruit  
and much more...

## Options

Horizontal feeding lifting platform  
5 cross-cutting knives  
Hygienic inclined conveyor belts  
Metal detector
