RED OFFAL SPLITTER
56AR-570AR

USE
La Parmentière red offal washing machines are intended mainly for cleaning and removing traces of blood, etc., found on pig, sheep and beef tongues and hearts.

PERFORMANCE

- The special design of the ribbed wheel and the appropriate motor speed, provide a threefold advantage :
- Very efficient movement of the products with no undue roughness, providing rapid processing (approximately 4-5 minutes).
- The weight lost is greatly reduced and this is due to the reduced time which products spend in the machine being processed.
- Optimum hourly output (see table).

Type	HOURLY OUTPUT (In kilos)
56AR	450
570AR	550
