

LASKA

Production lines

More efficiency, intuitive control and total hygiene.

Streamlining many stages into one. The Reference Line and Excellence Line production lines independently work to achieve a perfect result. The latter have diagnostic equipment that guarantee a consistently high and verifiable product quality.

1 Intuitive operation

Using 21.5" touch screen and user-friendly interface

2 Automated feed

Raw materials, water and flavourings are mixed together exactly as specified in the recipe to meet your requirements

3 Strict x-ray view

On Excellence Line only: Diagnostic equipment monitors the materials

4 State of the art materials handling

Screw conveyors, conveyor belts and pumps

5 Refined cleaning

Components can be moved, lowered or folded away for easy access to areas relevant for cleaning

6 Full compatibility

OPC UA interfaces ensure seamless networking and communication between machines
